The SciCord Informatics Platform is a comprehensive tool that takes the place of individual laboratory IT solutions across R&D and Commercial operations, reducing complexity and cost, and improving compliance and efficiencies measure.

Our Platform offers labs the ability to increase productivity, implement work processes simply and rapidly, maintain FDA 21 CFR part 11 compliance and lower internal IT expenses.

SciCord is a developer of laboratory informatics solutions, providing pharmaceutical organizations with a digital documentation solution to simplify their work processes, enable collaboration, and increase productivity.

Contact us today to discuss your work processes and how our Informatics Platform can help transform your lab into a compliant and more efficient place of work!

SCICORD
INFORMATICS

The Comprehensive and Compliant Platform your Pharmaceutical Lab Needs

Are you losing control of your lab data?

The SciCord Informatics Platform goes beyond LIMS and ELN capabilities to provide a comprehensive solution.

SCICORD

Getting the Most Out of Our Software	A Single Solution for Your Data Management	Leverage Spreadsheets for Easy Integration

INCREASED PRODUCTIVITY

Intuitive Spreadsheet paradigm promotes user acceptance and minimizes training. Review tools provide a measured **efficiency improvement of at least 30%**. Scientists can keep their favorite spreadsheets.

ACCELERATE TIME-TO-VALUE

A solution that can be implemented in weeks instead of months. Lab personnel will have a simple path to gaining digital efficiencies. **Rapid configuration** provides flexibility and a workflow that matches current lab methods.

LOWER INTERNAL IT EXPENSES

A cloud-based, SaaS provider that includes the latest technology and allows for **scalability** within the lab and organization.
Steer clear of niche solutions, technical debt, and incompatible infrastructure

DATA YOU CAN TRUST

Provides electronic records and electronic signatures to meet regulatory requirements, including **GxP** and **FDA 21 CFR Part 11** guidelines.
Designed for "Right-first-Time" data entry.

EASY USER INTERFACE

SciCord builds on a scientist's previous spreadsheet expertise, reducing training time and increasing user acceptance. Existing spreadsheets can be integrated into the SciCord Informatics Platform.

NO-CODE CONFIGURATION

SciCord's spreadsheet based approach provides an intuitive interface, speeds up implementation, reduces administrative overhead, and seamlessly integrates with your existing work processes, calculations, and reporting requirements.
